## COMMODITY ALERT

### BROCCOLI

June 17th, 2024

Please be advised that significant availability issues are currently affecting **broccoli supplies**. The recent heat dome weather event accelerated the growth of multiple broccoli plantings simultaneously, resulting in a supply gap that is expected to persist for the next few weeks. As a result, **broccoli is extremely limited and there are also quality concerns**. We are actively monitoring the situation and will provide updates as necessary. We recommend planning accordingly and considering alternative options if possible.

Thank you for your understanding and cooperation.
